INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 87 (1989)

SUBJECT INDEX

aromatic compounds
site of protonation of —: a neutralization–reionization study 275

Ar^{3+}
translational energy spectroscopy of Ar^{q+} (q = 1–4): single electron capture by Ar^{4+} in He and — in Ar 87

Ar^{4+}
translational energy spectroscopy of Ar^{q+} (q = 1–4): single electron capture by — in He and Ar^{3+} in Ar 87

biased activation cell
the utility of a — for laser-ion beam photodissociation studies 111

bis-catechol spiroborate
studies on spiroborate complexes. Part III. Fast atom bombardment mass spectrometry of — and its analogues 225

$C^+(^2P)$
ab initio calculation of the mobility of — and $C^+(^4P)$ in helium 181

$C^+(^4P)$
ab initio calculation of the mobility of $C^+(^2P)$ and — in helium 181

C^+ ions
effects of target identity and translational energy on collisional excitation of — 343

C_6F_5Br
FALP studies of electron attachment of C_6F_5Cl, — and C_6F_5I 331

CF_2Cl_2
determination of absolute partial and total electron impact ionization cross-sections for — from threshold up to 180 eV: an improved experimental method 209

C_6F_5Cl
FALP studies of electron attachment reactions of —, C_6F_5Br and C_6F_5I 331

C_6F_5I
FALP studies of electron attachment reactions of C_6F_5Cl, C_6F_5Br and — 331

CH_3CO^+
experimental evidence for the generation of $CH_2COH^{2+\cdot}$ from —. An application of charge stripping/charge separation mass spectrometry 135

$CH_2COH^{2+\cdot}$
experimental evidence for the generation of — from CH_3CO^+. An appliction of charge stripping/charge separation mass spectrometry 135

$[C_5H_5N]^{2+}$
electron capture-induced decomposition of the pyridine — ion 121

CO^+
CO_2 electron dissociation in the 18–46 eV range. A report of the O^+ and — abundances 41

CO_2
— electron dissociation in the 18–46 eV range. A report of the O^+ and CO^+ abundances 41

CO_2^{2+}
the energies of triplet states of — and OCS^{2+} ions. An experimental investigation by double-charge-transfer spectroscopy 349

delayed decomposition
a novel method for analysis of — by time-of-flight mass spectrometry R19

double-charge-transfer reactions
an experimental investigation of a reaction window in cross-sections for — R1

emitters
efficient — for surface ionization organic mass spectrometry 51

energy focusing
models for mass-independent space and — in time-of-flight mass spectrometry 313

external trapped ion source
— for ion cyclotron resonance spectrometry 237

high mass ions
external ion source FTMS instrument for analysis of — R7
H_3O ion
amended interpretation of the results obtained in an experimental investigation of the structure of the — R25
hydrocarbon flame
mass-spectrometry investigation of the anions and cations in a — doped with sulphur/fluorine additives 187

ion/molecule kinetics
toward quantitation of — in Fourier transform ion cyclotron resonance mass spectrometry 29

kinetic energy release
formula for — (KER) in collision-induced dissociations using momentum analysis 309
kinetic modelling
effects of matrix temperature on FAB spectra: — of the spectra 287

methyl butanoate ion
rearrangements of the — and its isomers: time and energy dependence of reactions on a complicated potential surface 61
molecular ion identification
isomeric — by UV laser photofragmentation 75

N_2O
—: a case study for acceleration region kinetics in a double-focusing mass spectrometer with a conventional Nier-type ion source 249

O^+
CO_2 electron dissociation in the 18–46 eV range. A report of the — and CO^+ abundances 41
OCS^{2+}
the energies of triplet states of CO_2^{2+} and — ions. An experimental investigation by double-charge-transfer spectroscopy 349

peak-finding
reliable — for MS/MS 141
platinum metal hexafluorides
gas-phase negative ions of platinum metal fluorides. II. Electron affinity of — 13
platinum metal tetrafluorides
gas-phase negative ions of platinum metal fluorides. I. Electron affinity of — 1

quadrupole mass filter
an improved model of the fringing fields of a — 157
quadrupole mass filter
influence of realistic fringing fields on the acceptance of a — 165

silicon-based distonic radical cations
stability of — R15
space focusing
models for mass-independent — and energy focusing in time-of-flight mass spectrometry 313

tetramethyltetraphenyltrisiloxane
particle bombardment (keV) mass spectra of a — at different temperatures and states of aggregation 95

vanadium fluorides
electron affinities of —. Additional experimental data and corrections R27
